

GMR Kamalanga Energy Limited

WATER EFFICIENCY SYSTEM MANAGEMENT POLICY ISO 46001: 2019

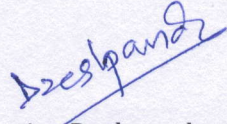

GMR Kamalanga Energy Limited is committed to establish, implement and follow water efficiency management system guided by the principles of reduce, reuse and recycle identifying water as a resource and conserve through efficient use.

To achieve the above, our priorities lie in the following areas:

- ◆ Optimize use of water through continuous monitoring and review of our processes.
- ◆ Manage & make efficient use of all forms of water by adopting industry wide best practices.
- ◆ Involve employees at all levels to inculcate Water Efficiency Management System culture by identifying Risks & opportunities for continual improvement in the processes.
- ◆ Provide Training and Awareness to employees and associates towards conservation of water to effectively carry out the requirements of Water Efficiency Management System.
- ◆ Comply with all relevant legal and other regulatory requirement on water Management.
- ◆ Carry out internal audits to identify areas for improvement and periodic reviews to exercise controls for long-term sustenance on water efficiency.

This policy will be displayed at prominent locations and will also be available to relevant stakeholders to ensure that it is understood, implemented, maintained and adhered to by employees at all levels within the organization.

Date: 1st-November -2023
